Better Belle III Pepper

Capsicum annuum 'Better Belle III'

Height: 30 inches

Spread: 18 inches

Spacing: 24 inches

Sunlight: ☉

Hardiness Zone: (annual)

Group/Class: Sweet Bell

Description:

A wonderful disease resistant, early maturing variety perfect for any garden; produces large, shiny and blocky bell peppers with thick walls and a delicious, sweet taste; developing from green to red, these are great stuffed, baked, in salads at any stage

Edible Qualities

Better Belle III Pepper is an annual vegetable plant that is commonly grown for its edible qualities. It produces green peppers (which are technically 'berries') with red flesh which are usually ready for picking from early summer to early fall. The fruit will often fade to red over time. The peppers have a sweet taste and a crisp texture.

The peppers are most often used in the following ways:

- Fresh Eating
- Eating When Cooked/Prepared
- Cooking
- Baking
- Freezing

Planting & Growing

Better Belle III Pepper will grow to be about 30 inches tall at maturity, with a spread of 18 inches. When planted in rows, individual plants should be spaced approximately 24 inches apart. This vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop.

This plant is typically grown in a designated vegetable garden. It should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This is a selected variety of a species not originally from North America.

Better Belle III Pepper is a good choice for the vegetable garden, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.

We are so proud of the nursery stock that we have carefully selected for superior quality and performance, WE GUARANTEE ALL TREES, SHRUBS, EVERGREENS & VINES FOR 2 YEARS; ROSES FOR 1 YEAR!
