### Spicy Lime Foamy Bells Heucherella 'TNHERSL'

Plant Height: 8 inches Flower Height: 15 inches

Spread: 14 inches Spacing: 12 inches Hardiness Zone: 4

### **Description:**

A striking variety producing cutleaf lime green foliage with deep red markings and chartreuse overtones in an impressive color display; very light pink bells rise on spikes in spring; a vigorous grower that forms a dense mound

#### **Ornamental Features**

Spicy Lime Foamy Bells is primarily valued in the garden for its distinctive form, with the flower stalks towering over the foliage. It features dainty spikes of shell pink bell-shaped flowers rising above the foliage from mid to late spring. The flowers are excellent for cutting. Its attractive deeply cut lobed leaves emerge chartreuse in spring, turning lime green in color with distinctive dark red spots and tinges of chartreuse. As an added bonus, the foliage turns a gorgeous gold in the fall.

#### **Landscape Attributes**

Spicy Lime Foamy Bells is a dense herbaceous evergreen perennial with tall flower stalks held atop a low mound of foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. It is a good choice for attracting hummingbirds to your yard. It has no significant negative characteristics.

Spicy Lime Foamy Bells is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Groundcover
- Container Planting

#### **Planting & Growing**

Spicy Lime Foamy Bells will grow to be about 8 inches tall at maturity extending to 15 inches tall with the flowers, with a spread of 14 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in partial shade to shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. Consider covering it with a thick layer of mulch in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Spicy Lime Foamy Bells is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
