## Japanese Sago Palm

Wauwatosa

(414) 763-6599

Oconomowoc

1570 Unity Drive

Cycas revoluta

Height: 6 feet

Spread: 5 feet

Sunlight: 0 0

Hardiness Zone: (annual)

Other Names: King Sago, Cycad, syn. Cycas miquelii

### **Description:**

A very symmetrical plant with leathery leaves that resemble feathers; trunk is very low to subterrannean in young plants, but lengthens with age; very slow growing, and may eventually branch; a beautiful accent or container plant

### **Ornamental Features**

Japanese Sago Palm features showy spikes of tan flowers rising above the foliage in mid fall. Its attractive large narrow pinnately compound leaves emerge chartreuse in spring, turning green in color the rest of the year.

### Landscape Attributes

Japanese Sago Palm is a multi-stemmed annual with a shapely form and gracefully arching foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This plant will require occasional maintenance and upkeep, and should not require much pruning, except when necessary, such as to remove dieback. It has no significant negative characteristics.

4860 W Wisconsin Ave

- Accent
- Mass Planting
- Rock/Alpine Gardens
- General Garden Use
- Container Planting

#### **Planting & Growing**

Japanese Sago Palm will grow to be about 6 feet tall at maturity, with a spread of 5 feet. It has a low canopy with a typical clearance of 2 feet from the ground. Although it's not a true annual, this slow-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would

Japanese Sago Palm is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
