# Arabella Clematis Clematis 'Arabella'

Height: 5 feet Spread: 5 feet Sunlight: 0

Hardiness Zone: 4

### **Description:**

A non-climbing variety; beautiful lavender blue star flowers all season; attracts hummingbirds; intermingle with other plants in the garden, or containers; plant in full sun and keep the roots cool for best results

## **Ornamental Features**

Arabella Clematis features showy lavender star-shaped flowers with blue overtones and white anthers at the ends of the branches from late spring to early fall. It has green deciduous foliage. The compound leaves do not develop any appreciable fall color.

#### **Landscape Attributes**

Arabella Clematis is a multi-stemmed deciduous shrub with a ground-hugging habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub. It is a Type 3 clematis; each spring it should be pruned back to within a few inches of the ground, as it flowers on new wood of the season. It is a good choice for attracting hummingbirds to your yard. It has no significant negative characteristics.

Arabella Clematis is recommended for the following landscape applications;

- Accent
- General Garden Use
- Container Planting

### **Planting & Growing**

Arabella Clematis will grow to be about 5 feet tall at maturity, with a spread of 5 feet. It has a low canopy with a typical clearance of 1 foot from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in both summer and winter to conserve soil moisture and protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid.

Arabella Clematis makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
