Blue Girl Meserve Holly

Ilex x meserveae 'Blue Girl'

Height: 12 feet

Spread: 15 feet

Sunlight:

Hardiness Zone: 5

Other Names: Blue Holly

Description:

One of the hardiest evergreen hollies, this is a large, spreading shrub with the traditional spiny blue-green foliage and showy red berries in winter; requires a male pollinator, often paired with Blue Boy

Ornamental Features

Blue Girl Meserve Holly is primarily grown for its highly ornamental fruit. It features an abundance of magnificent red berries from mid fall to late winter. It has dark green evergreen foliage. The spiny oval leaves remain dark green throughout the winter.

Landscape Attributes

Blue Girl Meserve Holly is a dense multi-stemmed evergreen shrub with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting birds to your yard. It has no significant negative characteristics.

Blue Girl Meserve Holly is recommended for the following landscape applications;

Planting & Growing

Blue Girl Meserve Holly will grow to be about 12 feet tall at maturity, with a spread of 15 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 40 years or more. This is a female variety of the species which requires a male selection of the same species growing nearby in order to set fruit.

This shrub does best in full sun to partial shade. You may want to keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It requires an evenly moist well-drained soil for optimal growth, but will die in standing water. It is very fussy about its soil conditions and must have rich, acidic soils to ensure success, and is subject to chlorosis (yellowing) of the foliage in alkaline soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid.

Blue Girl Meserve Holly makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.

We are so proud of the nursery stock that we have carefully selected for superior quality and performance, WE GUARANTEE ALL TREES, SHRUBS, EVERGREENS FOR 2 YEARS, AND ROSES FOR 1 YEAR!
