## White Clips Bellflower Campanula carpatica 'White Clips'

Height: 8 inches

Spread: 8 inches

Sunlight: 0 O

Hardiness Zone: 2

Other Names: Carpathian Harebell, Carpathian Bellflower

### **Description:**

Beautiful in borders and beds, this low growing, mounded selection presents bright white, bell-shaped flowers with green foliage; fast growing, blooming through the summer months; excellent in rock gardens and patio containers; deadhead regularly

### **Ornamental Features**

White Clips Bellflower is smothered in stunning white bell-shaped flowers at the ends of the stems from late spring to late summer. Its round leaves remain green in color throughout the season.

### Landscape Attributes

White Clips Bellflower is a dense herbaceous perennial with a mounded form. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard. It has no significant negative characteristics.

White Clips Bellflower is recommended for the following landscape applications;

Oconomowoc 1570 Unity Drive

White Clips Bellflower will grow to be about 8 inches tall at maturity, with a spread of 8 inches. Its foliage tends to remain low and dense right to the ground. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This is a selected variety of a species not originally from North America.

White Clips Bellflower is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
