Tricolor Dracaena Dracaena marginata 'Tricolor'

Height: 8 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 10

Other Names: Dragon Tree

Description:

A popular indoor plant that is easy to grow and care for; produces narrow, ribbon-like green leaves with red and cream stripes; can be used as an accent tabletop or floor plant; tolerates low light areas

Features & Attributes

Tricolor Dracaena's attractive glossy narrow leaves remain green in color with prominent red stripes and tinges of creamy white throughout the year on a plant with an upright spreading habit of growth. The dark green stems can be quite attractive and add to the plant's interest.

This is an herbaceous evergreen houseplant with an upright spreading habit of growth. Its relatively coarse texture stands it apart from other indoor plants with finer foliage. This plant may benefit from an occasional pruning to look its best.

Planting & Growing

When grown indoors, Tricolor Dracaena can be expected to grow to be about 8 feet tall at maturity, with a spread of 3 feet. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant performs well in both bright or indirect sunlight and strong artificial light, and can therefore be situated in almost any well-lit room or location. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine.

WE GUARANTEE ALL TREES, SHRUBS, EVERGREENS FOR 2 YEARS, AND ROSES FOR 1 YEAR!

We are so proud of the nursery stock that we have carefully selected for superior quality and performance,

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
