Winter Jewels® Black Diamond Hellebore

Helleborus 'Black Diamond'

- Height: 18 inches
- Spread: 22 inches
- Spacing: 18 inches
- Sunlight: ● ●
- Hardiness Zone: 4

Other Names: Lenten Rose, Winter Rose

Group/Class: Winter Jewels Series

Description:

This stunning variety produces bushy mounds of thick evergreen leaves; dark red flower stalks bear showy, cup shaped, deep purple to black blooms from late winter to spring; a great selection for shade gardens

Ornamental Features

Winter Jewels Black Diamond Hellebore features showy nodding deep purple cup-shaped flowers with black overtones at the ends of the stems from late winter to early spring. Its attractive serrated oval compound leaves remain dark green in color throughout the year. The fruit is not ornamentally significant.

Landscape Attributes

Winter Jewels Black Diamond Hellebore is an herbaceous evergreen perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Winter Jewels Black Diamond Hellebore is recommended for the following landscape applications;

Planting & Growing

Winter Jewels Black Diamond Hellebore will grow to be about 15 inches tall at maturity, with a spread of 22 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years.

This plant does best in partial shade to shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. This particular variety is an interspecific hybrid, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

We are so proud of the nursery stock that we have carefully selected for superior quality and performance, WE GUARANTEE ALL TREES, SHRUBS, EVERGREENS & VINES FOR 2 YEARS; ROSES FOR 1 YEAR!
