Blue Zinger Blue Sedge Carex flacca 'Blue Zinger'

Height: 18 inches Spread: 18 inches Sunlight:

Hardiness Zone: 4

Other Names: Carex glauca

A vigorous sedge that can grow in very diverse habitats; a tall, upright cultivar with attractive blue-green foliage; great in full sun or under the shade of large trees; suitable for rock gardens or as a groundcover but must have sufficient water

Ornamental Features

Blue Zinger Blue Sedge is primarily valued in the garden for its interestingly mounded form. Its attractive grassy leaves remain bluish-green in color with showy silvery blue variegation throughout the year.

Landscape Attributes

Blue Zinger Blue Sedge is a dense herbaceous evergreen perennial grass with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

- General Garden Use

- Groundcover

Planting & Growing

Blue Zinger Blue Sedge will grow to be about 18 inches tall at maturity, with a spread of 18 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in partial shade to shade. It is quite adaptable, prefering to grow in average to wet conditions, and will even tolerate some standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in both summer and winter to conserve soil moisture and protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
