Regal Shields Elephant's Ear

Alocasia 'Regal Shields'

Height: 6 feet

Spread: 4 feet

Sunlight: 

Hardiness Zone: (annual)

Other Names: Alocasia, Taro

Description:

Impressive deep green leaves, with a dark purple overlay and lighter green veins, emerge in a compact, upright and arching habit; elegant as a large accent or screen; perfect for patio containers

Ornamental Features

Regal Shields Elephant's Ear's attractive enormous crinkled heart-shaped leaves remain dark green in color with distinctive light green veins and tinges of deep purple throughout the year on a plant with an upright spreading habit of growth. It features solitary conical powder blue hooded flowers with white centers rising above the foliage in mid summer.

Landscape Attributes

Regal Shields Elephant's Ear is an open herbaceous annual with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and usually looks its best without pruning, although it will tolerate pruning. It has no significant negative characteristics.

Regal Shields Elephant's Ear is recommended for the following landscape applications;

Planting & Growing

Regal Shields Elephant's Ear will grow to be about 6 feet tall at maturity, with a spread of 4 feet. It has a low canopy with a typical clearance of 2 feet from the ground. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant should be grown in a location with partial shade or which is shaded from the hot afternoon sun. It is quite adaptable, preferring to grow in average to wet conditions, and will even tolerate some standing water. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets.

Regal Shields Elephant's Ear is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.

We are so proud of the nursery stock that we have carefully selected for superior quality and performance, WE GUARANTEE ALL TREES, SHRUBS, EVERGREENS FOR 2 YEARS, AND ROSES FOR 1 YEAR!
