Candy Cane Cocktail™ Rose Rosa 'Meiriansois'

Height: 3 feet Spread: 3 feet Sunlight: 0

Hardiness Zone: 5

Group/Class: Floribunda Rose

Candy Cane Cocktail Rose flowers Photo courtesy of NetPS Plant Finder

Description:

Beautiful bicolored blooms of white with deep rosy-red edges contrast wonderfully against glossy, deep green foliage; upright bushy habit; excellent disease resistance and impressive reblooming; great cut flower quality

Ornamental Features

Candy Cane Cocktail Rose features showy lightly-scented white flowers with rose edges at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has forest green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Candy Cane Cocktail Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Candy Cane Cocktail Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Candy Cane Cocktail Rose will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
