Iseli Fastigiata Spruce

Picea pungens 'Iseli Fastigiata'

Height: 40 feet

Spread: 15 feet

Sunlight:

Hardiness Zone: 2

Other Names: Blue Colorado Spruce; Colorado Blue Spruce

Description:

One of the more distinctive evergreens, featuring bright blue needles on a narrowly upright and columnar form, branches forking upwards at a sharp angle; best used as a vertical accent in smaller home landscapes, really draws the eye

Ornamental Features

Iseli Fastigiata Spruce is primarily valued in the landscape for its rigidly columnar form. It has attractive bluish-green evergreen foliage which emerges blue in spring. The needles are highly ornamental and remain bluish-green throughout the winter. The rough gray bark adds an interesting dimension to the landscape.

Landscape Attributes

Iseli Fastigiata Spruce is a dense evergreen tree with a strong central leader and a narrowly upright and columnar growth habit. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance tree. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Iseli Fastigiata Spruce is recommended for the following landscape applications;

- Accent
- Vertical Accent

Planting & Growing

Iseli Fastigiata Spruce will grow to be about 40 feet tall at maturity, with a spread of 15 feet. It has a low canopy with a typical clearance of 3 feet from the ground, and should not be planted underneath power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 80 years or more.

This tree should only be grown in full sunlight. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for xeriscaping or the moisture-conserving landscape. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species.

We are so proud of the nursery stock that we have carefully selected for superior quality and performance, WE GUARANTEE ALL TREES, SHRUBS, EVERGREENS FOR 2 YEARS, AND ROSES FOR 1 YEAR!
