Thriller Lady's Mantle Alchemilla 'Thriller'

Height: 18 inches

Spread: 18 inches

Sunlight: 0

Hardiness Zone: 2

Description:

A mounded selection that features tiny chartreuse star shaped blooms and light green, scalloped foliage; low maintenance, and tolerant of both shaded and sunny areas; great for groundcover, garden beds, borders and cut flower arrangements

Ornamental Features

Thriller Lady's Mantle features subtle cymes of chartreuse flowers at the ends of the stems from early to mid summer. The flowers are excellent for cutting. Its large crinkled round leaves remain lime green in color throughout the season.

Landscape Attributes

Thriller Lady's Mantle is a dense herbaceous perennial with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spreading

Thriller Lady's Mantle is recommended for the following landscape applications;

Planting & Growing Thriller Lady's Mantle will grow to be about 18 inches tall at maturity, with a spread of 18 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant performs well in both full sun and full shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
