French Tarragon Artemisia dracunculus 'Sativa'

Plant Height: 18 inches Flower Height: 3 feet Spread: 24 inches

Sunlight: 0

Hardiness Zone: 4

Description:

A culinary herb that can be added fresh or dried to eggs, meat, vegetables, vinegars and sauces; thrives in well-drained soils and full sun; wet soils and winters can cause plant to die

Ornamental Features

French Tarragon's attractive small fragrant narrow leaves remain dark green in color throughout the season on a plant with an upright spreading habit of growth.

Landscape Attributes

French Tarragon is a dense herbaceous perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and can be pruned at anytime. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

French Tarragon is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Herb Gardens
- Container Planting

Planting & Growing

French Tarragon will grow to be about 18 inches tall at maturity extending to 3 feet tall with the flowers, with a spread of 24 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should only be grown in full sunlight. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

French Tarragon is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
