Brilliance Autumn Fern

Dryopteris erythrosora 'Brilliance'

Height: 18 inches

Spread: 18 inches

Sunlight: ● ●

Hardiness Zone: 4

Other Names: Japanese Red Shield Fern

Description:

Lovely deep green fronds; fiddleheads and fronds emerge copper colored; great woodland and shade garden plant; keep evenly moist

Ornamental Features

Brilliance Autumn Fern is primarily valued in the garden for its cascading habit of growth. Its attractive glossy ferny compound leaves emerge coral-pink in spring, turning forest green in color with prominent coppery-bronze tips the rest of the year.

Landscape Attributes

Brilliance Autumn Fern is a dense herbaceous evergreen fern with a shapely form and gracefully arching fronds. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Brilliance Autumn Fern is recommended for the following landscape applications;

Planting & Growing

Brilliance Autumn Fern will grow to be about 18 inches tall at maturity, with a spread of 18 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 15 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in partial shade to shade. It is quite adaptable, preferring to grow in average to wet conditions, and will even tolerate some standing water. It is particular about its soil conditions, with a strong preference for rich, acidic soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This is a selected variety of a species not originally from North America, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

We are so proud of the nursery stock that we have carefully selected for superior quality and performance, WE GUARANTEE ALL TREES, SHRUBS, EVERGREENS FOR 2 YEARS, AND ROSES FOR 1 YEAR!
