Limemound Spirea

Spiraea japonica 'Limemound'

Limemound Spirea
Photo courtesy of NetPS Plant Finder

Height: 24 inches

Spread: 3 feet

Sunlight: ○

Hardiness Zone: 2

Other Names: Spiraea x bumalda

Description:

A beautiful shrub for color effect in the garden, with shimmering lime-green foliage which emerges bronze, turning red in fall, and flat-topped clusters of pink flowers in early summer; forms a dense, compact ball, neat and tidy

Ornamental Features

Limemound Spirea is bathed in stunning clusters of hot pink flowers at the ends of the branches from late spring to early summer. It has attractive lime green deciduous foliage which emerges yellow in spring. The small serrated pointy leaves are highly ornamental and turn an outstanding red in the fall.

Landscape Attributes

Limemound Spirea is a multi-stemmed deciduous shrub with a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Limemound Spirea is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- General Garden Use
- Groundcover

We are so proud of the nursery stock that we have carefully selected for superior quality and performance, WE GUARANTEE ALL TREES, SHRUBS, EVERGREENS FOR 2 YEARS, AND ROSES FOR 1 YEAR!

Planting & Growing

Limemound Spirea will grow to be about 24 inches tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

We are so proud of the nursery stock that we have carefully selected for superior quality and performance, WE GUARANTEE ALL TREES, SHRUBS, EVERGREENS FOR 2 YEARS, AND ROSES FOR 1 YEAR!
