**Frydek Elephant's Ear**

*Alocasia micholitziana 'Frydek'*

Height: 3 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 8

Other Names: Elephant Ear, Taro

**Description:**

Amazing large heart shaped leaves are velvety dark green with dramatic white veins; visually elegant as a garden accent; can tolerate some cold and grows well in containers

**Ornamental Features**

Frydek Elephant's Ear's attractive large heart-shaped leaves remain dark green in color with distinctive white veins throughout the year on a plant with an upright spreading habit of growth.

**Landscape Attributes**

Frydek Elephant's Ear is an open herbaceous evergreen perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and usually looks its best without pruning, although it will tolerate pruning. It has no significant negative characteristics.

Frydek Elephant's Ear is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Container Planting

**Planting & Growing**

Frydek Elephant's Ear will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. It is quite adaptable, preferring to grow in average to wet conditions, and will even tolerate some standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets.

Frydek Elephant's Ear is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
