**Description:**

This popular, easy care houseplant will form dense stands of vertical leaves, arranged in a rosette, spreading by rhizomes to fill an area; this compact variety produces silvery-green leaves, mottled and striped with dark green; a beautiful indoor accent

**Features & Attributes**

Futura Robusta Snake Plant's attractive large twisted narrow leaves remain grayish green in color with showy dark green variegation and tinges of silver throughout the year on a plant with an upright spreading habit of growth.

This is an herbaceous evergreen houseplant with an upright spreading habit of growth. This plant may benefit from an occasional pruning to look its best.

**Planting & Growing**

When grown indoors, Futura Robusta Snake Plant can be expected to grow to be about 24 inches tall at maturity, with a spread of 12 inches. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant performs well in both bright or indirect sunlight and strong artificial light, and can therefore be situated in almost any well-lit room or location. It is very adaptable to both dry and moist soil, and should do just fine under average home conditions. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil pH, but grows best in sandy soil. Contact the store for specific recommendations on pre-mixed potting soil for this plant.
