Cayennetta Pepper
Capsicum annuum 'Cayennetta'

Height: 24 inches

Spread: 18 inches

Spacing: 15 inches

Sunlight: ☉

Hardiness Zone: (annual)

Other Names: Ornamental Chili, Chili Pepper

Description:

A well branched, upright, plant with lance shaped green leaves; green fruits progress to red when they mature; produces a heavy yield of mildly spicy fruit; perfect for the garden, or patio containers

Edible Qualities

Cayennetta Pepper is an annual vegetable plant that is commonly grown for its edible qualities, although it does have ornamental merits as well. It produces dark green narrow peppers (which are technically 'berries') which are typically harvested when mature. The fruit will often fade to red over time. The peppers have a spicy taste and a crisp texture.

The peppers are most often used in the following ways:

- Fresh Eating
- Cooking
- Drying
- Seasoning
- Sauces

Planting & Growing

Cayennetta Pepper will grow to be about 24 inches tall at maturity, with a spread of 18 inches. When planted in rows, individual plants should be spaced approximately 15 inches apart. This vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop.

This plant is quite ornamental as well as edible, and is as much at home in a landscape or flower garden as it is in a designated vegetable garden. It should only be grown in full sunlight. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Cayennetta Pepper is a good choice for the vegetable garden, but it is also well-suited for use in outdoor containers and hanging baskets. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.

We are so proud of the nursery stock that we have carefully selected for superior quality and performance, WE GUARANTEE ALL TREES, SHRUBS, EVERGREENS FOR 2 YEARS, AND ROSES FOR 1 YEAR!
