**Golden Jubilee Tomato**

Solanum lycopersicum 'Golden Jubilee'

Height: 5 feet

Spread: 24 inches

Spacing: 3 feet

Sunlight: ☉

Hardiness Zone: (annual)

Group/Class: Heirloom-Indeterminate

Description:

A perfect heirloom slicer variety to add interest to patio containers and gardens; produces golden orange, globed shaped fruit with a well balanced flavor, great for slicing, salads and salsas; staking or caging is required; disease resistant

Edible Qualities

Golden Jubilee Tomato is an annual vegetable plant that is typically grown for its edible qualities, although it does have ornamental merits as well. It produces gold round tomatoes (which are technically 'berries') with orange overtones and gold flesh which are usually ready for picking from early summer to early fall. This is an indeterminate variety, which means it produces fruit throughout the growing season. The tomatoes have a delicious taste and a juicy texture.

The tomatoes are most often used in the following ways:

- Fresh Eating
- Eating When Cooked/Prepared
- Cooking
- Canning
- Sauces

Planting & Growing

Golden Jubilee Tomato will grow to be about 5 feet tall at maturity, with a spread of 24 inches. When planted in rows, individual plants should be spaced approximately 3 feet apart. Because of its vigorous growth habit, it may require staking or supplemental support. This fast-growing vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop.

This plant can be integrated into a landscape or flower garden by creative gardeners, but is usually grown in a designated vegetable garden. It should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America, and it is considered by many to be an heirloom variety.

Golden Jubilee Tomato is a good choice for the vegetable garden, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
