Sweeter Yet Cucumber

Cucumis sativus 'Sweeter Yet'

Height: 18 inches

Spread: 6 feet

Spacing: 9 inches

Sunlight:

Hardiness Zone: (annual)

Description:

A disease resistant, high yielding and vigorous vining variety; long, burpless, dark green cucumbers; crisp and bitter free, perfect for slicing, snacking, salads and pickling; thin skin requires no peeling; trellis or staking is recommended

Edible Qualities

Sweeter Yet Cucumber is an annual vegetable plant that is commonly grown for its edible qualities. It produces green long cucumbers (which are technically 'berries') with light green flesh which can be harvested at any point. The cucumbers have a delicious taste and a crisp texture.

The cucumbers are most often used in the following ways:

- Fresh Eating
- Eating When Cooked/Prepared
- Pickling

Planting & Growing

Sweeter Yet Cucumber will grow to be about 18 inches tall at maturity, with a spread of 6 feet. When planted in rows, individual plants should be spaced approximately 9 inches apart. This vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop.

This plant is typically grown in a designated vegetable garden. It should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is quite intolerant of urban pollution, therefore inner city or urban streetside plantings are best avoided. This is a selected variety of a species not originally from North America.; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Sweeter Yet Cucumber is a good choice for the vegetable garden, but it is also well-suited for use in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing the canvas against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
