**Cubanelle Pepper**  
*Capsicum annuum 'Cubanelle'*

Height: 30 inches

Spread: 30 inches

Spacing: 24 inches

Sunlight: ☉

Hardiness Zone: (annual)

Group/Class: Sweet Tapered

**Description:**

An excellent high yielding variety with a compact bushy habit; produces long, tapered peppers with thin walls; best picked while still yellow-green or when mature and scarlet red; mildly spicy, delicious for sauces, salads, stuffing, frying or roasting

**Edible Qualities**

Cubanelle Pepper is an annual vegetable plant that is commonly grown for its edible qualities, although it does have ornamental merits as well. It produces light green long peppers (which are technically 'berries') with a yellow blush which are usually ready for picking from mid summer to early fall. The fruit will often fade to red over time. The peppers have a mild taste and a crisp texture.

The peppers are most often used in the following ways:

- Fresh Eating
- Eating When Cooked/Prepared
- Cooking
- Baking
- Sauces

**Planting & Growing**

Cubanelle Pepper will grow to be about 30 inches tall at maturity, with a spread of 30 inches. When planted in rows, individual plants should be spaced approximately 24 inches apart. This vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop.

This plant can be integrated into a landscape or flower garden by creative gardeners, but is usually grown in a designated vegetable garden. It should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This is a selected variety of a species not originally from North America, and it is considered by many to be an heirloom variety.

Cubanelle Pepper is a good choice for the vegetable garden, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
