Rock 'N Grow® Coraljade Stonecrop
Sedum 'Coraljade'

Height: 18 inches

Spread: 30 inches

Spacing: 28 inches

Sunlight: ☉ ●

Hardiness Zone: 3

Other Names: Autumn Stonecrop, Showy Stonecrop

Group/Class: Rock 'N Grow Collection

Description:

This exceptional variety features rich green foliage, topped by citron green buds that open into soft coral pink flowers; blooms cover the dome shaped plant in late summer to early fall; very showy in a mass planting, prefers poor soils and dry conditions

Ornamental Features

Rock 'N Grow Coraljade Stonecrop has masses of beautiful clusters of coral-pink star-shaped flowers with shell pink overtones at the ends of the stems from late summer to early fall, which emerge from distinctive lime green flower buds, and which are most effective when planted in groupings. The flowers are excellent for cutting. Its attractive large succulent round leaves remain grayish green in color with distinctive pink edges and tinges of silver throughout the season.

Landscape Attributes

Rock 'N Grow Coraljade Stonecrop is a dense herbaceous perennial with a mounded form. Its relatively coarse texture can be used to stand it apart from other garden plants with finer foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Rock 'N Grow Coraljade Stonecrop is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Rock 'N Grow Coraljade Stonecrop will grow to be about 16 inches tall at maturity, with a spread of 30 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 28 inches apart. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 15 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil pH, but grows best in poor soils, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Rock 'N Grow Coraljade Stonecrop is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
