Ice Dance Sedge

Carex morrowii 'Ice Dance'

Height: 12 inches

Spread: 15 inches

Sunlight: ○ ◐ ●

Hardiness Zone: 4

Other Names: Creeping Japanese Sedge

Description:

A low maintenance, cool weather ornamental grass featuring fast growing plants in the early spring and fall; beautiful narrow, arching foliage with forest green centers and creamy-white margins; well suited for containers, borders or garden beds

Ornamental Features

Ice Dance Sedge is primarily valued in the garden for its cascading habit of growth. Its attractive grassy leaves are forest green in color with prominent white stripes. The foliage often turns brown in fall.

Landscape Attributes

Ice Dance Sedge is an herbaceous evergreen perennial grass with a shapely form and gracefully arching stems. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spreading

Planting & Growing

Ice Dance Sedge will grow to be about 12 inches tall at maturity, with a spread of 15 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant performs well in both full sun and full shade. It prefers to grow in moist to wet soil, and will even tolerate some standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Ice Dance Sedge is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a canvas of foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.

We are so proud of the nursery stock that we have carefully selected for superior quality and performance, WE GUARANTEE ALL TREES, SHRUBS, EVERGREENS FOR 2 YEARS, AND ROSES FOR 1 YEAR!
