**Sitting Pretty™ Rose**

***Rosa 'Radbeauty'***

Height: 4 feet

Spread: 4 feet

Sunlight:

Hardiness Zone: 4

**Description:**

A wonderful disease resistant selection with a medium demask scent; bubblegum pink blooms with touches of peach in the center bloom profusely on rounded bushy plants; a great conversation piece suitable for containers or garden landscapes

**Ornamental Features**

Sitting Pretty Rose features showy lightly-scented fully double pink flowers with peach centers at the ends of the branches from mid spring to mid fall. The flowers are excellent for cutting. It has emerald green deciduous foliage. The oval compound leaves do not develop any appreciable fall color.

**Landscape Attributes**

Sitting Pretty Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. It has no significant negative characteristics.

Sitting Pretty Rose is recommended for the following landscape applications;

**Planting & Growing**

Sitting Pretty Rose will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. To help this plant achieve its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

Sitting Pretty Rose makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
