Chateau™ de Chambord Rose of Sharon

Hibiscus syriacus 'Minsyre10'

Chateau de Chambord Rose of Sharon flowers
Photo courtesy of NetPS Plant Finder

Height: 6 feet

Spread: 4 feet

Sunlight: ○ ◐

Hardiness Zone: 5

Other Names: Shrub Althea

Group/Class: Chateau Series

Description:

Large rosy-pink blooms with deep crimson centers are plentiful and extremely showy along the branches throughout the summer; a stiffly upright shrub with a vase shaped habit; a very adaptable plant, but prefers full sun

Ornamental Features

Chateau de Chambord Rose of Sharon features bold rose round flowers with crimson centers along the branches from early summer to early fall. The flowers are excellent for cutting. It has green deciduous foliage. The lobed leaves do not develop any appreciable fall color.

Landscape Attributes

Chateau de Chambord Rose of Sharon is a multi-stemmed deciduous shrub with an indistinguished habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting bees, butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects
- Disease

We are so proud of the nursery stock that we have carefully selected for superior quality and performance, WE GUARANTEE ALL TREES, SHRUBS, EVERGREENS FOR 2 YEARS, AND ROSES FOR 1 YEAR!

Chateau de Chambord Rose of Sharon is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use
- Container Planting

Planting & Growing

Chateau de Chambord Rose of Sharon will grow to be about 6 feet tall at maturity, with a spread of 4 feet. It tends to be a little leggy, with a typical clearance of 1 foot from the ground, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Chateau de Chambord Rose of Sharon makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.

We are so proud of the nursery stock that we have carefully selected for superior quality and performance,
