Height: 18 inches

Spread: 24 inches

Sunlight: ◐

Hardiness Zone: 5

Other Names: Japanese Woodland Grass

Description:

Graceful arching grassy foliage is gold colored and almost bamboo-like, makes a spectacular color accent in the garden, beautiful along pathways, edges and containers; provide good drainage; can have nice reddish-tan color in fall

Ornamental Features

All Gold Hakone Grass is primarily valued in the garden for its cascading habit of growth. It attractive grassy leaves are gold in color. The foliage often turns tan in fall.

Landscape Attributes

All Gold Hakone Grass is a dense herbaceous perennial grass with a shapely form and gracefully arching stems. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and usually looks its best without pruning, although it will tolerate pruning. It has no significant negative characteristics.

All Gold Hakone Grass is recommended for the following landscape applications;

Planting & Growing

All Gold Hakone Grass will grow to be about 18 inches tall at maturity, with a spread of 24 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 15 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should be grown in a location with partial shade or which is shaded from the hot afternoon sun. It requires an evenly moist well-drained soil for optimal growth, but will die in standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

All Gold Hakone Grass is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a canvas of foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.

We are so proud of the nursery stock that we have carefully selected for superior quality and performance,
