Weeping White Spruce

Picea glauca 'Pendula'

Height: 50 feet

Spread: 10 feet

Sunlight: ☐ ☒

Hardiness Zone: 2

Description:

This stately evergreen has nice blue-green foliage that hugs the trunk, sweeping downward to create a fantastic impression; prefers sun or light shade and rich moist soil but is adaptable; the perfect accent tree for defining lawn areas or walkways

Ornamental Features

Weeping White Spruce is primarily valued in the landscape for its distinctively pyramidal habit of growth. It has bluish-green evergreen foliage which emerges light green in spring. The needles remain bluish-green throughout the winter.

Landscape Attributes

Weeping White Spruce is an open evergreen tree with a strong central leader and a distinctive and refined pyramidal form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance tree. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. It has no significant negative characteristics.

Weeping White Spruce is recommended for the following landscape applications;

- Accent
- Vertical Accent

Planting & Growing

Weeping White Spruce will grow to be about 50 feet tall at maturity, with a spread of 10 feet. It has a low canopy, and should not be planted underneath power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 50 years or more.

This tree does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. This is a selection of a native North American species.
