Siskiyou Mexican Evening Primrose

Oenothera berlandieri 'Siskiyou'

Height: 12 inches

Spread: 30 inches

Spacing: 26 inches

Sunlight: ☉

Hardiness Zone: 4

Other Names: *Oenothera speciosa* var. *childsii*

Description:

A compact, prostrate plant with flowers stalks holding shell- to rose-pink cup-shaped flowers above the plant; a vigorous ground-hugging grower, makes an excellent ground cover

Ornamental Features

Siskiyou Mexican Evening Primrose has masses of beautiful lightly-scented shell pink cup-shaped flowers with rose overtones and yellow eyes along the stems from late spring to early fall, which are most effective when planted in groupings. Its oval leaves remain olive green in color throughout the season.

Landscape Attributes

Siskiyou Mexican Evening Primrose is an herbaceous perennial with a ground-hugging habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

Planting & Growing

Siskiyou Mexican Evening Primrose will grow to be about 12 inches tall at maturity, with a spread of 30 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 26 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should only be grown in full sunlight. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selection of a native North American species. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

We are so proud of the nursery stock that we have carefully selected for superior quality and performance, WE GUARANTEE ALL TREES, SHRUBS, EVERGREENS FOR 2 YEARS, AND ROSES FOR 1 YEAR!
