**Purple Moon™ Torenia**

Torenia 'Purple Moon'

Height: 6 inches

Spread: 12 inches

Spacing: 8 inches

Sunlight: ● ●

Hardiness Zone: (annual)

Other Names: Wishbone Flower

Group/Class: Moon Series

Description:

A vigorous variety with a bushy, trailing habit, that is suitable for planting in shaded to full sunlight areas; large, tubular flowers appear all season long; perfect for containers, hanging baskets or garden beds

Ornamental Features

Purple Moon Torenia features showy purple tubular flowers with yellow throats and a lavender flare along the stems from late spring to mid fall. Its small fragrant pointy leaves remain green in color throughout the season.

Landscape Attributes

Purple Moon Torenia is an herbaceous annual with a trailing habit of growth, eventually spilling over the edges of hanging baskets and containers. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This plant will require occasional maintenance and upkeep, and should not require much pruning, except when necessary, such as to remove dieback. It is a good choice for attracting bees and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Purple Moon Torenia is recommended for the following landscape applications;

Planting & Growing

Purple Moon Torenia will grow to be only 6 inches tall at maturity, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 8 inches apart. Its foliage tends to remain low and dense right to the ground. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant does best in partial shade to shade. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant does not require much in the way of fertilizing once established. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Purple Moon Torenia is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. Because of its trailing habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
