White-Variegated Hosta Hosta fortunei 'Albomarginata'

Plant Height: 30 inches Flower Height: 4 feet

Spread: 5 feet Spacing: 4 feet Sunlight: **D**

Hardiness Zone: 2

Other Names: Plantain Lily, Funkia

White-Variegated Hosta foliage Photo courtesy of NetPS Plant Finder

Description:

Low growing mounds of large, dark green leaves with white margins, create a perfect backdrop for shaded gardens and borders; lilac-pale lavender flowers rise above during the mid to late summer; easy to grow and low maintenance

Ornamental Features

White-Variegated Hosta features dainty spikes of lavender bell-shaped flowers rising above the foliage in mid summer. Its attractive enormous textured pointy leaves remain emerald green in color with showy white variegation throughout the season.

Landscape Attributes

White-Variegated Hosta is a dense herbaceous perennial with tall flower stalks held atop a low mound of foliage. Its wonderfully bold, coarse texture can be very effective in a balanced garden composition.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

Insects

White-Variegated Hosta is recommended for the following landscape applications;

Planting & Growing

White-Variegated Hosta will grow to be about 30 inches tall at maturity extending to 4 feet tall with the flowers, with a spread of 5 feet. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 4 feet apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in partial shade to shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
